

HI FORM

BreedPlus

Hi Form BreedPlus offers essential support for weanlings, yearlings and broodmares. Includes an excellent level and balance of calcium and phosphorous. This plays a role in normal growth and maintenance of bones.

BreedPlus is a complete amino acid, vitamin and high available calcium formula with an emphasis on essential minerals. Contains trace elements and will assist in maintaining the health of pregnant and lactating mares, weanlings and yearlings.

ALL IN ONE GREAT PRODUCT THE BEST START

Our BreedPlus formula has been specifically designed for breeding stock. Broodmares, breeding stallions, foals and yearlings. This formula is designed to support the growth and development of the foetus and young horse, the mare through her pregnancy and lactation stages as well as the servicing stallion.

Research has shown that developmental orthopedic diseases such as OCD, cervical vertebral malformations, angular deformities, contracted tendons and physitis can be caused by many factors such as genetic predisposition, management practices, diseases and dietary influences. Good nutrition may assist with these types of conditions.

DOSAGE RATES
 300kg : 12.5gm (2/3 large scoop)
 500kg : 25.5gm (1.5 large scoop)
 600+ kg : 34gm (2 large scoop)
 Mix well into slightly damp feed.

MILK THISTLE

Safe to use throughout pregnancy and lactation, it has an array of actions. Mainly known for its liver protective effects, in reproducing horses it enables sufficient detoxification of waste products and toxins and increases the effectiveness of antioxidants and anti-inflammatory mediators. Especially targeted for stallions and broodmares to significantly reduce the toxin load and therefore may increase fertility. In addition, as the name suggests, Milk Thistle is a galactagogue meaning it promotes milk production, which is important for the lactating mare.

BIOEQUUS

The synergy between prebiotics and probiotics supported by the gut soothing certified organic herb extracts, helps to restore a healthy balance and benefits metabolism in the digestive system. Horses love this formula and the BioEquus helps to maintain a healthy bacterial flora and has a beneficial impact on metabolic processes. BioEquus will assist in maintaining a healthy gut microbiome.

MINERAL TISSUE SALTS

Biochemical tissue salts, or cell salts, are mineral salts that exist in the cells and play a critical role in cellular metabolism.

**Including Calcium, Phosphorus, Zinc, Vitamin D, Folate and Vitamin A.
